PROFESSIONAL SUMMARY

Backend Developer and Systems Engineering student at UNAD with experience building APIs and backend systems using Python and FastAPI. Passionate about learning new technologies, solving problems, and working collaboratively in team environments. Motivated to continuously improve technical skills and contribute to innovative remote projects.

TECHNICAL SKILLS

- Python
- SQLAlchemy
- Pytest
- HTML5
- FastAPI
- JWT Authentication
- Git & GitHub
- CSS3
- PostgreSQL
- Docker & Docker Compose
- REST API Development
- JavaScript
- MongoDB
- Alembic
- API Testing
- Responsive Design

PROJECTS

TASKFLOW API

Personal Project

2026
Present

Developed a task management backend API using FastAPI with secure JWT authentication, PostgreSQL database integration, Docker support, CRUD operations, filtering, pagination, and API testing.

Technologies: Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, JWT, Pytest, Alembic

PERSONAL PORTFOLIO WEBSITE

Personal Project

2026
Present

Currently developing a responsive portfolio website to showcase projects, technical skills, and backend development experience using modern frontend technologies.

Technologies: HTML5, CSS3, JavaScript, Responsive Design

EDUCATION

Systems Engineering

Universidad Nacional Abierta y a Distancia (UNAD)

Eighth Semester

LANGUAGES

- Spanish - Native
- English - B2 (Intermediate)

SOFT SKILLS

- Teamwork
- Problem Solving
- Communication
- Adaptability
- Responsibility
- Continuous Learning
- Self-Motivation
- Fast Learning

ADDITIONAL SKILLS

- RESTful API Design
- Clean Code Principles
- Database Design
- Version Control with Git
- API Documentation (Swagger / Redoc)
- Agile Methodologies (Basic Knowledge)
- Testing & Debugging
